BIOPSY

- **SKIN BIOPSY is the removal of any growth on the skin. The sample is processed and evaluated by a doctor under the microscope. Your dermatologist will then review the microscopic findings and coordinate treatment for your condition.**

- **WOUND CARE INSTRUCTIONS**
 - **Remove bandage tomorrow morning**
 - **Gently wash with soap and water (ok to shower)**
 - **Apply antibiotic ointment (Bacitracin, Polysporin, Neosporin, Vaseline, Aquaphor) followed by a band-aid daily until a scab forms or stitches are removed**
 - **Normal wound healing includes a yellow discoloration in the center of the wound with a surrounding red ring**
 - **Call our office if signs or infections occur (redness / pus / pain / fever)**
 - **If you haven't received a call regarding your biopsy results within 3 weeks; please call our office**
